Allowance

1. Claims 1, 4-7, 17-24, 27-30, 36, 139, 142-157, 270-273 and 283-286 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Robinson et al, U.S. Patent No. 5,533,102 (hereinafter Robinson) discloses a system for providing information related to voice calls only. "The telephone 12 of the system 10 is connected to a private branch exchange (PBX) through a first communication channel that can carry the voice of a caller to the user" (Robinson, Column 4, lines 42-45). Figures 5-8 of Robinson depict flow charts showing options such as "caller willing to hold" and "inform caller that the called party is still busy," and, "Play greeting to caller" which clearly indicate that the invention in Robinson is indicated for use by voice callers. Neither paths in the flow charts, nor any portion of the description indicates that data and fax calls are handled by the invention in Robinson. Because the system disclosed in Robinson does not deal with multiple types of calls, such as data, fax, and voice calls, it also fails to disclose means for distinguishing between types of calls, as required by claim 1.
